Quiz: Electric Cars: Inconvenient Facts Part 2

Directions: Select the answer that best completes the sentence

- 1) Electric cars need batteries because _____.
 - A) there is a shortage of energy efficient gas cars
 - B) batteries never wear out
 - C) there are not enough charging stations along roads
 - D) batteries store electric power

- 2) One of John Stossel's "inconvenient facts" in this video is that we _____.
 - A) do not have enough oil to continue to drive gas-powered cars
 - B) do not have enough electricity for all electric cars
 - C) can save the planet even if China keeps building coal-burning power plants
 - D) can easily get enough power from renewable energy sources

- 3) The protestors who said that "oil & gas is going to take everything we know and love" _____.
 - A) seem ignorant of how oil & gas help provide heat, transportation, even food
 - B) destroyed art, which proves how much they have thought about this topic
 - C) were praised by Mark Mills for their thoughtfulness
 - D) were intentionally showing how silly some protests can be

- 4) The process of obtaining materials to produce batteries for electric cars _____.
 - A) has no adverse environmental impact, making electric cars the best option
 - B) shows that electric car buyers are environmental heroes
 - C) is 100 percent clean because the batteries are manufactured in factories
 - D) is worth the cost because producing electric car batteries is inexpensive

- 5) The main point of this video is that _____.
 - A) electric car batteries are far better at storing energy than oil and gas
 - B) if coal were used to heat more homes, we'd have enough oil and gas for cars
 - C) regardless of the push for electric cars, we still need to use oil and gas
 - D) we should drive less and heat our homes less than we do now

Answer Key for Electric Cars: Inconvenient Facts Part 2:

1. D
2. B
3. A
4. C
5. C
